PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with industry internship experience in Data Analysis, AI Engineering, and Data Science. Skilled in developing machine learning models, building AI-driven advisory systems, integrating large language models, and performing data-driven analytics to support strategic decision-making.

INTERNSHIP EXPERIENCE

Data Analytics and Data Science Intern

Aenexz (Ongoing)

- Performing advanced data analysis and predictive modeling on real-world datasets.
- Applying feature engineering, statistical techniques, and visualization to extract insights.
- Working across the complete data science lifecycle including preprocessing, modeling, and evaluation.

AI Engineer Intern

Infosys Springboard

Duration: 2 Months

- Contributed to the development of an AI and Large Language Model-based mobile stock screener and advisory platform.
- Designed data preprocessing pipelines and implemented machine learning models for stock trend analysis.
- Integrated LLM-powered modules to generate personalized investment insights and contextual risk assessments.
- Enabled intelligent stock screening and data-driven financial recommendations.

Data Analysis Intern

Cognifyz Technologies

Duration: 1 Month

- Conducted exploratory data analysis (EDA) and data cleaning on business datasets.
- Developed dashboards and reports to support data-driven decision-making.
- Applied statistical analysis to identify performance trends.

PROJECTS

Plate Dispenser Using Face Recognition to Prevent Food Wastage in Hostel Mess

- Developed an IoT-enabled automated plate dispensing system using facial recognition technology.
- Implemented authentication and tracking mechanisms to minimize misuse.
- Reduced food wastage through controlled and verified allocation.

Time Series Financial Market Forecasting Using Hybrid ML and DL Models with Telegram Bot Integration

- Designed hybrid machine learning and deep learning models (LSTM + Regression) for financial forecasting.
- Implemented feature engineering and model evaluation techniques.
- Integrated Telegram Bot API for automated real-time forecast delivery.

AI-Based Legal Document Risk Detection Bot

- Built NLP-based classification system using BERT transformer models.
- Designed automated risk clause detection for legal documents.

Smart Gatepass Management System

- Developed role-based web application for digital gate pass approvals.
- Automated workflows between students, faculty, and administration.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science 2023 – 2027
Pace Institute of Technology and Sciences

Intermediate (12th Grade) 2021 – 2023
Board of Intermediate Education, Andhra Pradesh

Secondary School Certificate (SSC) 2021
Board of Secondary Education, Andhra Pradesh

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Supervised Learning, Unsupervised Learning, Logistic Regression, LSTM, NLP, BERT

AI Integration: Large Language Models, Predictive Modeling

Computer Vision: OpenCV, Face Recognition

Data Tools: Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Keras

Visualization: Power BI, Excel

Tools: Git, GitHub, VS Code

SOFT SKILLS

- Strong Communication Skills
- Effective Time Management
- Self-Motivated and Proactive Learner
- Problem-Solving Ability
- Team Collaboration

PUBLICATIONS

- Time Series Financial Market Forecasting Using Hybrid ML and DL Models with Telegram Bot Integration.
- Plate Dispenser Using Face Recognition to Prevent Food Wastage in Hostel Mess.

CERTIFICATIONS

SQL (Advanced)
